INDUSTRIAL & MOBILE

System Integrator for mobile and industrial applications. Specialized in mechatronic, hybrid and full-electric systems. Competence and Build Centre for Radio Remote Controls Systems.

INDUSTRIAL

Engineering and development of integrated hydraulic systems for the most demanding industrial applications: design and construction of hydraulic power units, manifolds and test benches.

FLUID CONVEYANCE

Bended pipes and flexible hoses for industrial and mobile applications, with 3D modeling expertise. Fittings and adaptors for hydraulics and pneumatics. Hydraulic components and filtration.

FLUID CONVEYANCE

Design and fitting of rubber hoses, simple and double wall stainless steel flexible pipes for high and very high temperatures and rigid, shaped pipes.

MOBILE

Design and manufacturing of hydraulic components: control valves, diverter valves, joysticks and foot pedals for the most demanding mobile applications.

MOBILE

System integrator for mobile applications specialized in electronic and hydraulic systems, hybrid and full electric machines.

**SERVICE &
MAINTENANCE
DIVISION**

INDUSTRIAL & MOBILE

A team of skilled technicians able to promptly intervene on every type of hydraulic system. Worldwide assistance during: machine assembly, commissioning, repairs and maintenance programs.
